2021 Milling and Paving Projects – Fall 2021

Department of Public Works has announced 2021 Milling and Paving projects will begin its milling phase in late September. Once again, streets which will be milled first and paved later, are based upon current road conditions, traffic usage, available funding, citywide needs and other projects impacting the street. Though paving may cause some inconveniences to our public, we try to keep them at a minimum and remain confident that the end results will be worth it. **Please note - paving can be subject to change.**

Please note that the order the streets are listed in below will be the order in which they will be milled then paved. If you have any questions, please call Public Works at 203-946-7700.
